

SmartPunch Plus Punch Die Sets

The SmartPunch Plus uses a variety of easily interchangeable die sets that allow you to punch documents in line for several different binding styles. By selecting the appropriate die set, you can use your SmartPunch Plus to punch documents in any of the following binding styles. DuraGlide HD™ die sets are shown in bold where available.

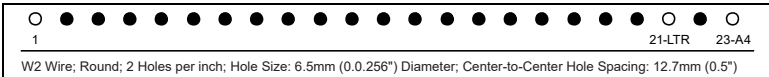

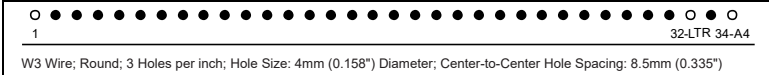

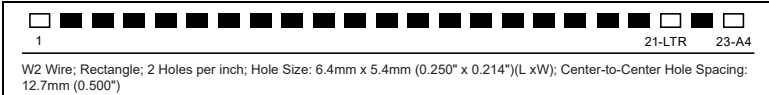

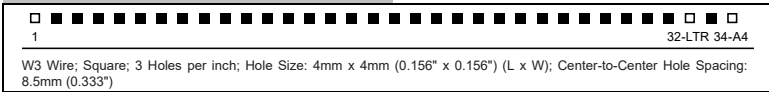

Die Set Description

For Plastic Comb Binding:

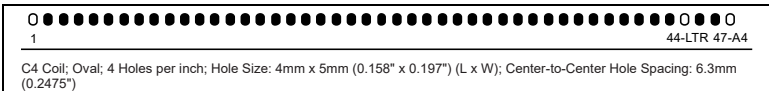

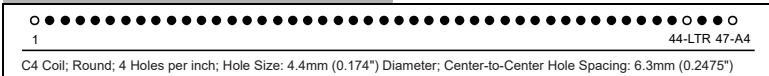

* When the Plastic Comb binding die is used in the 21 hole configuration on A4 width paper (297mm), there is the potential for the outer edge of holes 1 and 21 to be torn. The theoretical paper edge should be 1.62mm from the edge of the sheet. This event is dependent on paper type, paper width and hole alignment optimization. To avoid this issue, it is recommended to use a 20 hole configuration instead. 20 hole comb binding supplies are commonly available from GBC and other manufacturers and are considered more optimal than the 21 hole configuration.

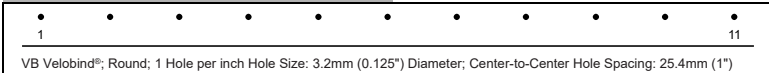

For Twin Loop™ Binding:

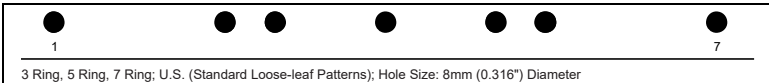

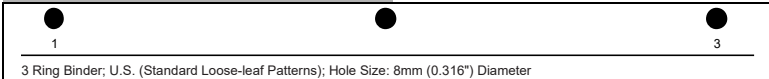

For Color Coil™ Binding:

For Velo® Bind:

For Loose Leaf Binding:
